

SEED Workshop 2018 Lab Evaluation: SQL Injection Attack Lab

18 responses

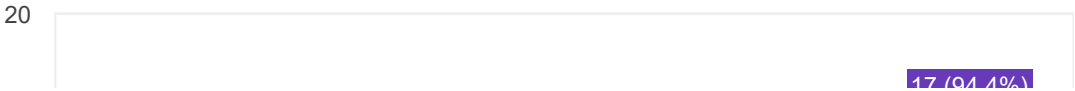

The pace of this session was appropriate.

18 responses

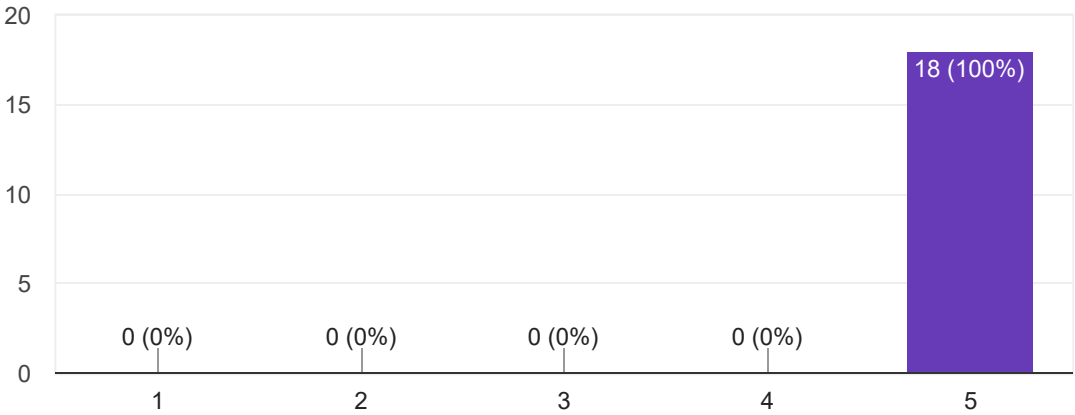

The presentation and instruction were clear to me.

18 responses

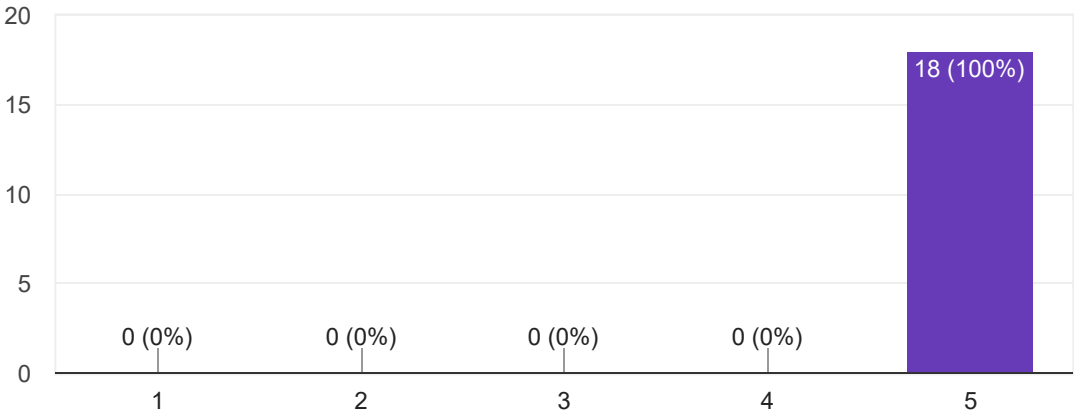

The instructor was helpful.

18 responses

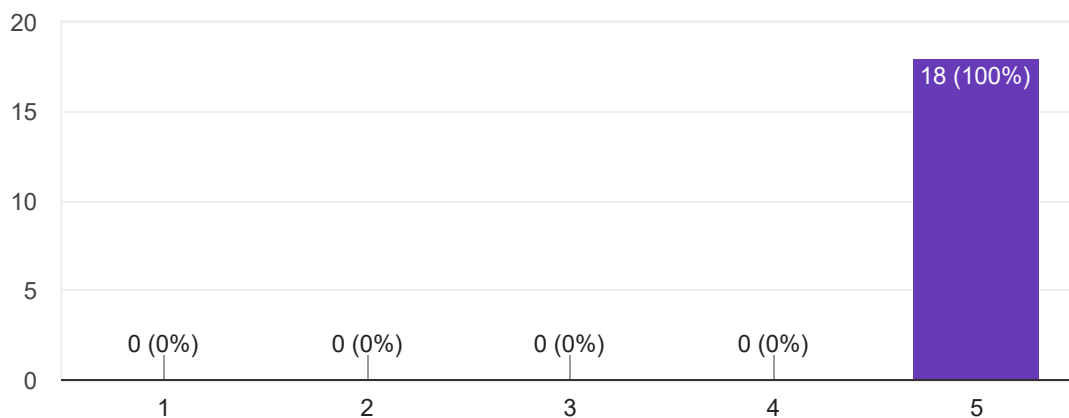

The session was worth my time.

18 responses

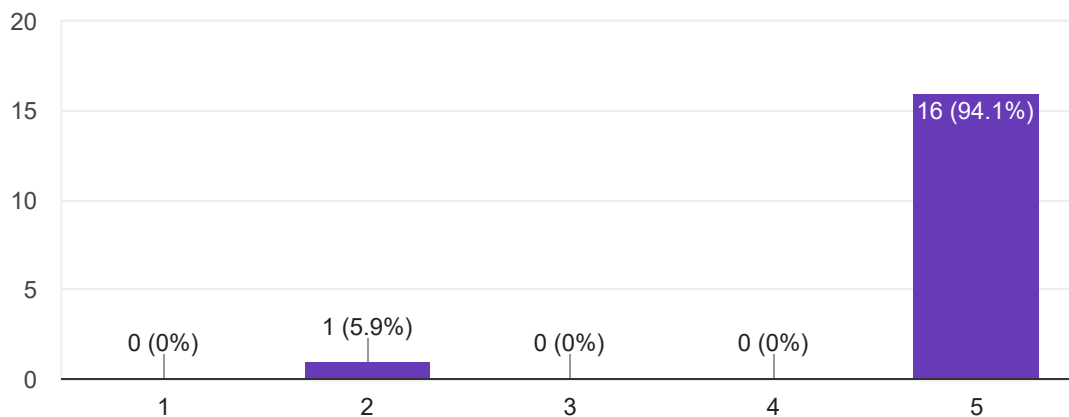

I now feel comfortable using this lab in my courses.

18 responses

I do plan to use this lab in my courses.

17 responses

What improvements would you recommend for the contents of this lab ?

7 responses

The lab's pace is good for high schoolers

none

Nicely done exercise.

Excellent lab - easy enough to understand and explain. Excellent job by our "guest" speaker.

use the kid more

I'd be interested in some advanced lab using SQL functions to build a reverse tcp shell. Something like:
https://security.stackexchange.com/questions/6919/leveraging-a-shell-from-sql-injection?utm_medium=organic&utm_source=google_rich_qa&utm_campaign=google_rich_qa

Very good lab, well prepared!!!

What improvements would you recommend for this session ?

3 responses

none

It was unclear when we first moved from working on the mysql database to working through the web form.

use the kid more! he was fantastic...
